| GraphQL      |                         |

## SUMMARY

A passionate software developer with over 4 years of experience in creating quality SaaS products. I have a flair for solving complex problems, working with clean code, and to find out the best possible solutions to design and frontend problems.

## WORK EXPERIENCE

### SR. SOFTWARE DEVELOPER

CreativeAI International GmbH | [Cogniwerk.ai](#)

#### September 2023 - Present

- Built a highly advanced multi model interface that let's users work with generative AI models like SDXL, FLUX, etc.
- Fully redesigned the platform with Vue + Vite for a cleaner, faster, and more reliable experience.
- Created a Canvas API powered tool that lets users paint directly on images or select specific objects to modify with AI.
- Built a user friendly interface for model training that lets users upload images, train custom models, and generate similar outputs.
- Built a robust asset management system that lets users organize all uploads and AI generations with tags, workspaces, folders, and advanced sorting.
- Created an interactive tool that allows users to draw custom regions on a blank canvas and generate objects into those specific regions with the help of AI

### SOFTWARE DEVELOPER

Digilet Labs LLP - ([bip.so](#), [ansy.ai](#), [ketchup.live](#))

#### May 2021 - Present

- Developed 3 SaaS products from planning to launch and beyond.
- Built rich text editor features in Slate.js, including embeds, mentions, and tables.
- Designed and implemented version control feature for documents including merge requests, diff, etc.
- Developed an API to transform HTML, MD, and DOCX files into the JSON format suitable for the slate.js editor..
- Led the team and built core features like PWAs, dark mode, push notifications,
- Conducted technical interviews with candidates and provided detailed feedback to the hiring team.
