Time Management

Attention to detail

SUMMARY

A passionate software developer with 2 years experience in creating quality SaaS products. I have a flair for solving complex problems and a keen interest towards product management.

WORK EXPERIENCE

SOFTWARE DEVELOPER

Digilet Labs LLP - (bip.so, ansy.ai, ketchup.live

May 2021 - Present

- Instrumental in the development of one main SaaS product and 2 other side projects, taking each project from initial planning and design stages to launch and beyond (Built with Next.js, React, Typescript, React native, etc)
- Successfully migrated a large scale app from React.js to Next.js, delivering improved performance and user experience while meeting tight deadlines.
- Implemented SEO best practices to improve website visibility, resulting in increased organic traffic and higher search engine rankings.
- Utilized Slate.js to build rich text editor capabilities. Within Slate.js, I focused on developing rich text editor features and components such as embeds, mentions, tables, comments, and much more.
- Designed and implemented a version control feature that facilitates document comparison within Slate.js, merge requests, and other functions within a platform for rich text editing.
- Developed an API using express to transform HTML, MD, and DOCX files into the JSON format required for effective display within the editor, which made it easier for people to transfer their documents.
- Contributed to the development of an admin dashboard using Nextjs for a Chat-GPT-based Discord bot.
- Led the frontend team on a time-sensitive progressive web application with calling functionality.
- Built Push Notifications for both PWA as well as the react native app that increased engagement between the app and users.
- Conducted technical interviews with candidates and provided detailed feedback to the hiring team.
- Acted as a mentor to interns, offering technical expertise and support to help them develop their skills.
